Description

This hard-hitting pump-action ammo is packed with the energy you need during your workout. The formula stimulates the nitric oxide pathway to cause incredible muscle pumps and increased muscular endurance during exercise. Containing three different types of Creatine, fuelling your body to avoid catabolic collapse. It empowers your body as well as your mind and prepares you to perform your best with laser guided focus and record-shattering accuracy. This is the long-range ammo needed to go a long way and hit a full-power high-velocity workout.
